

International targets and actions

Kay Harrison, Climate Change Ambassador

A Super Wicked Problem

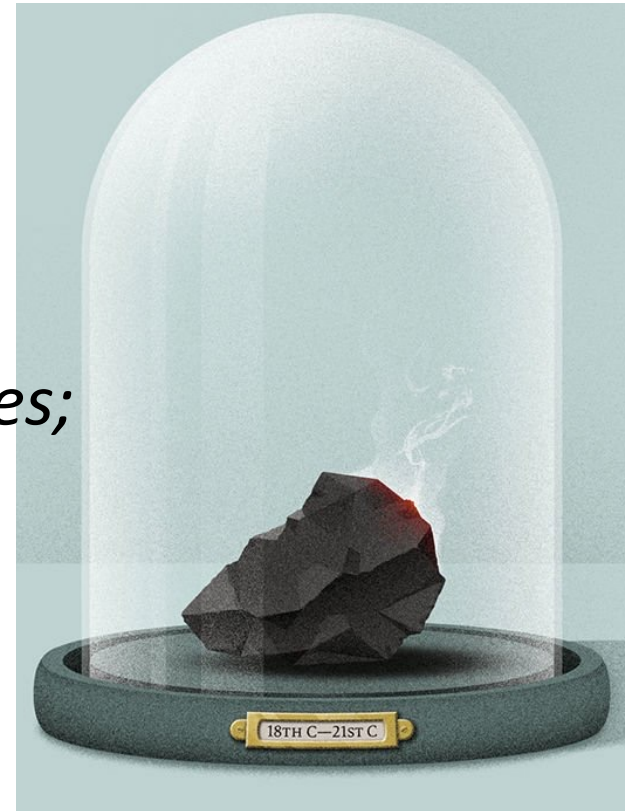

a growing realisation...

- UNFCCC 1992 *stabilization.. prevent dangerous interference in climate*
- Kyoto 1997 *developed countries must limit or reduce emissions*
-
- Paris 2015 *limit temperature rise; foster resilience; redirect finance (all) parties reach peaking asap with developed leading*
- Glasgow 2021 *urgency this decade; phase down coal; phase out subsidies*

international climate ***ACTION***

- Domestic legislation and architecture
 - *Science; budgets; plans*
- Clean energy revolution
 - *Power & transport: renewables; coal; hydrogen*
- ...and everything else
 - *Agriculture; waste; capture & sequestration*

“the period of consequences”

- *What we need to do:*
 - ❖ **Address the impacts** of Cyclone Gabrielle
 - ❖ **Adapt and build resilience** for future events
 - ❖ **Transition**: technology; ZEVs; address methane...
 - ❖ **Contribute to the global mitigation effort** & increase that
 - ❖ **Contribute finance to vulnerable countries** & increase that
